Sinikiwe Nangoku Jumba

Fullstack Software Engineer / Developer
062 264 7069 | South African | snirajumba@gmail.com | 8+ Years of Experience

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 8 years of comprehensive experience in full-stack development, specializing in C#, .NET Framework, Azure cloud services, and modern JavaScript frameworks. Proven track record of delivering scalable solutions across multiple industries including media, government, logistics, insurance, and education. Expert in implementing Design Patterns, Azure Service Bus architecture, and optimizing database performance. Strong advocate for structured SDLC practices with demonstrated ability to rapidly adapt to legacy and modern codebases while maintaining high code quality standards.

CAREER OVERVIEW

Company	Period	Position Held
MultiChoice Group	09/2025 - 07/2026	Software Developer
Tipp Focus	08/2024 - 08/2025	Developer
Genii Analytics AI	06/2022 - 04/2024	Software Engineer
Mfundopedia	01/2022 - 06/2022	Software Engineer
DataOrbis	06/2021 - 12/2021	Intermediate Software Developer
Affinity / Senwel Konsult	09/2020 - 06/2021	Software Engineer
Retro Rabbits	01/2019 - 04/2020	Junior Fullstack Developer
Enterprise Solution 365	01/2018 - 12/2018	Developer Internship

WORK EXPERIENCE

Software Developer

MultiChoice Group • Randburg, South Africa**Sep 2025 - Jul 2026**

- Contributed to the enforcement and strengthening of structured Software Development Life Cycle (SDLC) practices across multiple software divisions within a complex contractor-heavy environment
- Rapidly onboarded into existing codebases including legacy Ember.js applications and custom in-house architectures
- Collaborated closely with Application Support and Business stakeholders to investigate, resolve, and prevent production issues
- Refactored and enhanced existing code to improve readability, maintainability, and overall application performance

Tech: Ember.js, Custom frameworks, Enterprise SDLC processes, Cross-functional collaboration tools

Reason for Leaving: *Seeking stronger technical growth, clearer ownership, and long-term career progression.*

Developer (Consultant)

Tipp Focus - National Treasury (CSD) • Pretoria, South Africa **Aug 2024 - Aug 2025**

- Developed and maintained features for the Central Supplier Database (CSD) application serving government procurement processes
- Collaborated with Business Analysts to translate business requirements into technical specifications and prioritize development tasks
- Wrote and optimized SQL scripts, queries, and stored procedures for data management and reporting
- Managed Azure deployment pipelines and performed regular code reviews to maintain code quality standards
- Prepared application environments for new feature releases and system updates

Tech: C#, .NET Core, Razor, SQL Server, Report Builder, JavaScript, HTML, CSS, Azure, GitHub
Reason for Leaving: *Contract ended*

Software Engineer

Genii Analytics AI • Remote **Jun 2022 - Apr 2024**

- Developed, maintained, and supported a SaaS platform specializing in Conversational Analytics and Engagement AI solutions
- Played key role in sprint planning using Agile methodology, contributing to efficient project delivery
- Enhanced and automated deployment processes for multiple clients, reducing deployment time and manual intervention
- Optimized SQL queries and database performance, improving application response times
- Integrated Azure Web API endpoints to extend platform capabilities and improve system interoperability

Tech: C#, MVC.NET, JavaScript, SQL Server, SSMS, IIS, Bootstrap 5, Azure, RESTful APIs, HTML, CSS, GitHub
Reason for Leaving: *Remote work policy changed after three months; relocated to Johannesburg*

Software Engineer

Mfundopedia (Consulting for BidVest) • Johannesburg, South Africa **Jan 2022 - Jun 2022**

- Collaborated with BidVest to develop a Credit System Management platform facilitating the lending process
- Implemented rules and regulations enforcement for borrowing, repayment monitoring, and delinquent account handling
- Conducted client meetings to gather requirements and translate business needs into technical solutions
- Managed GitHub collaboration workflows and utilized IIS for seamless deployment processes
- Developed RESTful APIs and integrated third-party services using Postman for testing

Tech: C#, .NET, MVC, SQL Server, SSMS, IIS, PHP, Laravel, Bootstrap 5, RESTful APIs, Postman, GitHub, HTML, CSS
Reason for Leaving: *Left start-up to avoid burnout from extended hours and weekend work requirements*

Intermediate Software Developer

DataOrbis • Remote **Jun 2021 - Dec 2021**

- Upgraded front-end framework from Angular 1 to Angular 12 using Angular Material, significantly enhancing UI performance and user experience
- Developed and maintained Web APIs on the back-end to support logistics SaaS platform operations
- Ensured seamless integration between front-end and back-end components for optimal application efficiency
- Collaborated with cross-functional teams to deliver high-quality software solutions aligned with business objectives

Tech: C#, .NET, Azure, Angular 1 & 12, Bootstrap 5, Angular Material UI, PHP, RESTful APIs, Postman, Swagger
Reason for Leaving: *Company required relocation to Cape Town*

Software Engineer

Affinity / Senwel Konsult • Johannesburg, South Africa **Sep 2020 - Jun 2021**

- Transitioned to React Native development, establishing architecture for mobile applications in the insurance sector
- Integrated API services and implemented microservices architecture using Azure Service Bus and MongoDB functions
- Performed full-stack development including system architecture design and third-party program integration
- Conducted verification, testing, and deployment of programs and systems following DevOps best practices

Tech: C#, .NET, Azure, React Native, JavaScript, MongoDB, React Leaflet, Azure Service Bus, RESTful APIs, HTML, CSS, GitHub
Reason for Leaving: *Sought role with better balance between solo and collaborative projects*

Junior Fullstack Developer

Retro Rabbits Professionals • Johannesburg, South Africa **Jan 2019 - Apr 2020**

- Developed ReactJS educational application "Know Your Nation" using animations to teach children about South African history
- Collaborated with UX/UI designers throughout SDLC to gather requirements, develop, debug, test, and deploy applications
- Maintained Nissan website built with Django, Angular, and C# back-end
- Enhanced University of Pretoria lab application by adding features to streamline academic processes

Tech: C#, .NET, ReactJS, Django, Angular 6, Python, JavaScript, HTML, CSS, React Native, Animation Libraries, SQL Server
Reason for Leaving: *Retrenched due to COVID-19*

Developer Intern

Enterprise Solution 365 • Cape Town, South Africa **Jan 2018 - Dec 2018**

- Worked under senior developers and business analysts to develop Unity Life insurance applications
- Processed insurance applications, claims, and workflows while ensuring UI standards met business requirements
- Utilized SQL Server and stored procedures to perform data analysis and display results in MVC applications
- Developed web application to calculate and track matriculants' results for Western Cape Department of Education

Tech: C#, .NET, Azure, JavaScript, SQL Server, Ajax, jQuery, PHP, SSRS, IIS, CSS, HTML
Reason for Leaving: *Contract ended*

EDUCATION

Institution	Year Completed	Degree / Certificate
